

# BEL Framework Documentation V2.0 (Current version) Home

BEL Framework Documentation Site - Current Version

The BEL Framework is an emerging open-platform technology specifically designed to overcome many of the challenges associated with capturing, integrating, and storing knowledge within an organization, and sharing the knowledge across the organization and between business partners.

[View the OpenBEL Framework Documentation API](#)

All canonical BEL Framework Documentation is maintained as wiki pages. You can export these pages as PDF via the [Browse->Advanced->PDF Export service](#).

This is the home of the current BEL Framework Documentation.
